Portfolio: portfolio-website-ansh-sharma.vercel.app

## PROFESSIONAL SUMMARY

B.Tech CSE student (graduating 2027) with two software development internships building full-stack web applications in React, Node.js, and Express, covering REST APIs, database design, authentication, and debugging. My personal projects go further into AI, with LLM integration, retrieval-augmented generation (RAG), and computer vision in TypeScript and Python.

## TECHNICAL SKILLS

**Programming Languages:** JavaScript, TypeScript, Python, Java, C, SQL
**Frontend:** React, Next.js, HTML5, CSS3, Tailwind CSS
**Backend & APIs:** Node.js, Express.js, RESTful APIs, API Integration, JWT Authentication
**Databases:** PostgreSQL, MySQL, MongoDB, Supabase, Prisma ORM
**AI & ML:** LLM APIs (OpenAI, Anthropic, Gemini), LangChain, RAG, Ollama, FAISS, OpenCV, MediaPipe, scikit-learn
**Tools:** Git, GitHub, Docker, Postman, VS Code, Figma, Netlify, Render
**Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, SDLC, Debugging

## EXPERIENCE

**Junior Software Engineer Intern** | TechJain IT, Bhopal — June 2026 – September 2026

- Developed and deployed full-stack web application features using React, Node.js, Express, and database systems.
- Connected frontend and backend modules through RESTful APIs, handling data flow between the UI and server.
- Debugged and fixed application issues, improving user workflows and overall system efficiency.

**Full Stack Development Intern** | Dadamani Enterprises, Tamnar — June 2026 – July 2026

- Built responsive user interfaces and integrated server-side REST APIs to process user transactions.
- Managed database schemas, implemented user authentication flows, and maintained deployment scripts.
- Improved UI component rendering performance and simplified day-to-day user workflows.

**SEO Intern** | Digital Veda, Raipur — May 2026 – June 2026

- Carried out technical website audits, content optimization, and performance analytics reporting.

## PROJECTS

**AI Resume Analyser** | *React*, *TypeScript*, *Node.js*, *Express*, *PostgreSQL*, *Prisma*, *LLM APIs* — GitHub

- Built a full-stack app that parses PDF/DOCX resumes and uses LLMs to score them on ATS compatibility, formatting, and content, match them to job descriptions, and generate interview questions and skill roadmaps.
- Designed a layered Express REST API (controllers, services, repositories) on PostgreSQL with JWT auth, refresh-token rotation, Zod validation, and a switchable provider layer for Claude, OpenAI, and Gemini.

**NexoraRAG** | *Python*, *LangChain*, *Ollama*, *FAISS*, *Streamlit*, *Docker* — GitHub

- Implemented a local RAG pipeline that chunks uploaded PDF and text files, embeds them with Hugging Face models, and retrieves relevant passages from a FAISS vector store to answer questions.
- Ran local LLMs such as Gemma 3 through Ollama to keep documents private, added query expansion and cross-encoder re-ranking, and containerized the app with Docker Compose.

**Computer Vision Project** | *Python*, *OpenCV*, *MediaPipe*, *scikit-learn* — GitHub

- Developed a real-time hand gesture controller that tracks hand landmarks from a webcam with MediaPipe and OpenCV and maps finger counts to zoom and rotate actions via PyAutoGUI.
- Trained a KNN classifier on hand-landmark data after comparing five scikit-learn models with 10-fold cross-validation.

## EDUCATION

**O.P. Jindal University, Raigarh** — 2023 – 2027
Bachelor of Technology (B.Tech) in Computer Science & Engineering | CGPA: 6.4

**12th Grade, Indian School, Raigarh** | PCM — 2023

**10th Grade, Carmer School, Raigarh** — 2021

## CERTIFICATIONS & ACHIEVEMENTS

**Certifications:** HackerRank Software Engineer • Coursera: Android Mobile App Dev • Tata Forage: GenAI Data Analytics • Simplilearn: SQL

**Hackathons & Leadership:** Smart India Hackathon (SIH) 2024 & 2025 • Co-Convenor of Sponsorship, Technorollix • IEEE Student Member

**Competitions:** Adobe Hackathon Participant • UI/UX Competition Participant at IIIT Raipur
